TACENS

STELLA

Stella meets style and power in a unique mini-tower case for micro-ATX mainboards.
Its solid main chassis is manufactured of 0.5mm Japanese Steel and it has a perfect finishing in all edges.
Stella´s bright black front panel, black matt middle part, hidden 5.35" bay cover, white power led and its fully black 2xUSB and HD Audio ports will give a high-end-stylish-looking to the computer that will make it look sophisticated no matter where you have it.
It includes one rear ultra-silent 9cm world awarded TACENS Aura PRO fan and side air-grill for an optimal but silent cooling, and it allows to install a front 12cm fan for extra system cooling specially directed to the PCI cards area for high-end VGA cards. Its high quality plastic feet ensures its stability and chassis anti-vibrations.
Stella has the maximum compatibility with new generation components thanks to special features like the longest PCI area depth in its range with an outstanding 367mm that allows you to install the biggest and more powerful VGA cards in the market.
