AURA PRO II

FAN

New Tacens AURA PRO II fan, has, as the other fans of this serie, with the exclusive Tacens Fluxus Pro technology, updated in this case to provide even better performance and durability.

This new and improved version of the Aura Pro fan includes a smart modular system, with two speed adapters, so it can be used, appart from normal mode, in silent and ultra silent mode. AURA PRO II gets the highest performance and the besto cooling with the lowest noise.

It also has a PWM circuit, for faster and smarter dynamic fan speed adjustment with motherboard.

Every detail in this AURA PRO II has been designed to obtain the best results without noise, that's why it also includes rubber antivibration screws.

Fan Speed Mode	Normal Mode (+10%)	Silent Mode (+10%)	Ultra Silent Mode (+10%)
Lowest Fan Speed (RPM)	700	600	550
Max. Fan Speed (RPM)	1500	1200	900
Max. Airflow (CFM)	48,8	39,00	29,28
Max. air Pressure (mmH ₂ O)	1,18	0,94	0,71
Lowest Noise Level (dBA)	9	8	7
Max Noise Level (dBA)	16	14	12
